

# LET'S TALK BULLETIN

THE INTERIM NEWSLETTER OF EVIDENCE TALKS LTD October 2007

## Frankfurt favourite

MANAGING director Andrew Sheldon has once again been named as an expert speaker at the Storage Network World 2007 conference at the end of October.

The event, a magnet for data storage, protection and management professionals, runs from Monday the 29th to Wednesday the 31st.

Andrew will be giving two presentations:

- The technical issues (from a forensic perspective), of e-disclosure and e-discovery facing large organisations.
- Adding digital forensics to your incident response plans.

The first session examines how businesses can plan for and mitigate the impact of the e-disclosure and e-discovery process. The second looks at how forensic processes can be integrated into current incident response strategies.

# WE'VE

# WON IT!

THE whole team at Evidence Talks was celebrating this week after our Remote Forensics® system won a major award for innovation.

Commercial director Elizabeth Sheldon collected the trophy, sponsored by the Open University, in front of nearly 800 guests at a presentation ceremony at the new Milton Keynes Stadium.

Judges praised Evidence Talks for our ground-breaking software

development and the way we protected our intellectual property through the patent process.

Afterwards, delighted managing director Andrew Sheldon said: "We are

absolutely thrilled to win this award. It's a great honour and we are delighted for the recognition of the hard work, talent and dedication of the whole team here."

Remote Forensics® is set to

revolutionise the way organisations respond to digital incidents.

Using a totally secure Virtual Private Network, it allows

forensics experts to analyse digital media from anywhere in the world with a network connection or 3G link.

To arrange a demonstration, please call sales manager Phil Shell on 0845 125 4400.
